

City of Fujisawa, Japan Adopts Digital Guardian for Confidential Information Protection and Compliance with Japan's Personal Information Protection Act

Waltham, MA — October 11, 2005 — Verdasys, Inc. and Japanese distribution partner Rikei Corporation, today announced the enterprise sale of Verdasys' Digital Guardian "complete data security" software solutions to the City Government of Fujisawa, Japan for use in the protection of confidential information, and the prevention of private data loss in compliance with Japan's Personal Information Protection Act.

"Over the course of the past year we have seen an ever increasing number of very serious incidents related to the leakage and loss of personal data in both the private and public sectors around the world," said Katsuei Aoyagi, Rikei's Chief Executive Officer. "Securing and auditing this information is vital to protecting the privacy of citizens, and is now legally mandated by Japan's Personal Information Protection Act."

Fujisawa City will adopt Digital Guardian's "complete data security" platform to safeguard the data contained on PCs, laptops and servers distributed throughout government offices, and to monitor, control and audit what users can do with the sensitive data they handle. Fujisawa City will also utilize Digital Guardian's unique "context sensitive" enforcement capabilities to provide continuous education and awareness training to those government officials and employees responsible for maintaining the security of this information.

"We are especially pleased that Fujisawa City has selected Digital Guardian to protect the data handled by its government employees," said Seth Birnbaum, CEO of Verdasys. "We place tremendous value on this new relationship, and respect Fujisawa City's visionary approach to protecting the private information of its citizens".

About Fujisawa City

Fujisawa City is located 50 kilometers from metropolitan Tokyo, located on one of the most beautiful beaches in Japan. It is known as "a city you can live in comfortably for your entire life," and is home to some 390,000 citizens.

About Verdasys, Inc.

Verdasys is a provider of "complete data security" solutions, that protect data from loss, or misuse, at the point of use -- on laptops, desktops and servers. Through the real-time control and comprehensive monitoring of data usage at the host, Verdasys protects customer data, safeguards intellectual property, assures ongoing regulatory compliance, and secures outsourced environments at the least possible cost.
