

Verdasys Announces General Availability of the Industry's First Data Loss Prevention Solution

Waltham, MA – December 5, 2006 - Verdasys, Inc., the leader in Business Process Integrity solutions for information risk management, announced today the completion and general availability of the Data Loss Prevention (DLP) solution for complete control and protection of corporate data inside and outside of an organization.

Verdasys' comprehensive host based DLP solution integrates content, context and location awareness along with encryption and data level access controls to reduce the risk of information loss or misuse with the most comprehensive, cost-effective centrally managed solution for DLP. By utilizing content inspection and encryption components that are in use across millions of users, Verdasys provides the most mature, enterprise ready DLP available today. In addition, Verdasys supplies services performed by expert technical professionals that provide installation, deployment and training.

The DLP pre-launch was comprised of more than quarter of a million production users resulting in a fixed basic configuration and data protection solution pack, also generally available. Verdasys' unique data protection solution pack consists of a set of rules and policies embodying best practices for data loss and misuse prevention across seven key industries consisting of manufacturing, finance, insurance, aerospace and defense, high tech, telco, and government as well as for corporate compliance and secure outsourcing.

"The protection of data is vital to both CIGNA and our customers, and our experience in the Verdasys DLP pre-launch indicates that it is the most advanced, functionally effective, scalable and strategic data loss prevention approach we have seen to date," said Craig Shumard, Chief Information Security Officer of CIGNA.

This launch establishes Verdasys and its Digital Guardian solution as a leader in providing production tested, scalable, data protection and business process integrity management capabilities.

Verdasys' Digital Guardian is the only product platform that delivers the fundamental elements of Business Process Integrity under a scalable architecture with customer proven technology. Business Process Integrity protects information, applications and processes essential to maintaining the market value, proprietary assets, intellectual property, reputation and process integrity of a global enterprise.

"I'm exceedingly proud of our DLP solution," said Nick Stamos, President of Verdasys. "Verdasys was born of an unfortunate experience with data loss. We were amongst the first companies to gain the perception of the acute importance of dealing with this problem. We formed our company to prevent losses that can destroy a company's competitive position in its market and corrode shareholder value. This is serious stuff. We suffered the experience; we have the insight and are engineering the very best product to deal with this in the most effective way."

About CIGNA

CIGNA Corporation and its subsidiaries, with total assets of \$44 billion and an employee base of approximately 26,500, constitute one of the largest publicly-owned employee benefits organizations in the United States and throughout the world. Its subsidiaries are major providers of employee benefits offered through the workplace, with products and services including health care, group life, accident and disability insurance, dental, vision, behavioral health, and pharmacy.

About Verdasys, Inc.

Verdasys solutions protect proprietary and sensitive data and the integrity of the business processes essential to successfully conducting business on a global basis. The Digital Guardian platform creates a secure virtual perimeter that assures that data is controlled by policy and monitored for accountability establishing a community of trust between the data user, data owner and data provider. Digital Guardian is in use by government agencies, and by leaders in financial, pharmaceutical, insurance, healthcare, manufacturing, entertainment, and other industries around the world. Verdasys customers use Digital Guardian to comprehensively protect data wherever it's used. Verdasys is headquartered in Waltham, MA. For more information, please visit <http://www.verdasys.com>.
