

Verdasys Announces Latest Release of Its Digital Guardian Global Data Security Platform Software and New Oracle Version

Waltham, MA – February 8th, 2006 - Verdasys, Inc., the leader in Global Data Security Solutions, announced today the introduction of “Digital Guardian – Version 4.0”. This new version of Verdasys’ flagship product greatly enhances its innovative control, monitoring, reporting and auditing capabilities and now offers additional support for future product extensions. These extensions include add-on modules and ‘Solution Packs’ that will be showcased during RSA 2006 (San Jose, California, February 13th - 17th). In addition, the core Digital Guardian platform software has been expanded to support Oracle databases, giving it the ability to handle large enterprise deployments around the world.

“This new version of Verdasys - Digital Guardian allows us to offer our customers the ability to rapidly deploy and scale their solutions to true global enterprise levels,” said Seth Birnbaum, CEO of Verdasys. “We also now have the capability to offer focused Solution Packs that our customers have been requesting in order to address specific data security needs, including the ability to handle large volumes of outsourced data, and the data interchanged within global supply chains. With these new solutions, our customers will be able to protect their data comprehensively across all applications, channels of communication, and across the numerous portable storage and other devices that represent significant data security threats to the global enterprise.”

About Verdasys, Inc.

Verdasys is leading the industry in providing *global data security solutions* based on innovative “point of use” technologies. Our Digital Guardian platform is in use by government agencies, and by leaders in financial, pharmaceutical, insurance, healthcare, manufacturing, entertainment, and other industries around the world. Verdasys customers use Digital Guardian to complement their existing security technologies in order to comprehensively protect data wherever it’s used.
