

Verdasys Announces the Release of Corporate Data Loss and Misuse Prevention Summary Brochure and Related Seminar Event Featuring Speakers from Leading Industry Analyst Firm and Broadcom

Waltham, MA – February 5, 2007 - Verdasys, Inc., the leader in integrated solutions for data loss prevention, corporate compliance and data security announced today the release of their new Corporate Brochure entitled, “*Data Loss Prevention*.” *Data Loss Prevention* describes Digital Guardian’s comprehensive data control and protection solutions including Content Inspection, Adaptive Encryption, Community of Trust and Application Compliance for the complete protection of corporate data inside and outside of global companies.

Verdasys also announced today that it will be the sponsor of a related seminar event on February 15th, 2007 in Los Angeles to showcase this urgent corporate need and to serve as a forum for a general discussion about the strategies for containing data and protecting business processes across the global enterprise. Jonathan Penn, VP, Research Director with Forrester will be a featured speaker at this event, as will Geoff Aranoff, Director, Information Security of Broadcom.

The brochure and seminar were released to inform companies of current state-of-the-art opportunities to protect corporate, client and supply chain information globally. “The explosion of interest and inquiries for Verdasys’ corporate data loss and leakage prevention solutions demonstrates the recognition that companies want to address corporate compliance and control issues using a scalable integrated technology combined with world class services,” said Seth Birnbaum, CEO, Verdasys. “CIO’s and CSO’s are looking for functionality at the convergence of data security and content management which is precisely what our Digital Guardian solutions deliver. These broad, new requirements cut across all industries including manufacturing, finance, insurance, healthcare, aerospace and defense, high tech, Telco, government and outsourcing,” he added.

Digital Guardian technology has been developed for Global 2000 companies looking to assure corporate compliance and business processes integrity by providing the data security everywhere information is accessed, used or transferred through comprehensive, flexible content monitoring, multi-level control and mobile data encryption.

“Someone cannot steal your car without you noticing, I can steal your data and yet you still have it. You only know it’s gone when the misuse of it becomes visible,” said Dan Geer, Chief Scientist, Verdasys. “People who steal data know this and they act accordingly. Therefore, your only – repeat, only – option is prevention. Prevention can only be done at the point of use; everything else is somewhere between a fraud and a half measure. Digital Guardian is the comprehensive solution for Data Loss Prevention. Use it!”
