

Verdasys to Highlight Broad Coverage for Data Loss Prevention and Data Security at Forrester's Security Forum EMEA

Waltham, MA – March 24, 2008 - Verdasys Inc., the first company to provide enterprise-wide data security solutions for the Global 2000, and with more than 1 million agents deployed, the leader in host based data security, announced today that it will showcase Digital Guardian, an award-winning data loss prevention (DLP) software platform at Forrester's Security Forum EMEA, April 2-3 at the Moevenpick Hotel in Amsterdam.

Verdasys, a silver sponsor at the event, will be discussing the critical data loss issues facing business and security managers and how Digital Guardian's unique platform approach helps solve these issues across a wide array of business scenarios. Verdasys will be located at Booth S2 and visitors will have the chance to receive a free autographed copy of the new book "Economics and Strategies of Data Security," by Dr. Dan Geer, Jr., Sc.D, Verdasys Vice President and Chief Scientist.

Digital Guardian's fifth generation integrated software platform enables companies to understand and manage the risks to their sensitive information through fully integrated data discovery, classification, monitoring, control and encryption. The Digital Guardian software platform approach makes possible the automated enforcement of corporate information security policies in real time, not only promoting an internal culture of accountability, but also securing information wherever and whenever it is accessed, modified or communicated.

"Digital Guardian's unique integrated software platform addresses the broadest set of data security challenges faced by today's global organizations" said Seth Birnbaum, CEO, Verdasys. "Digital Guardian offers comprehensive information management through a centralized and highly flexible security policy implementation engine enabling unprecedented enterprise wide visibility into data location, movement, usage and control," he added.

The Forrester Security Forum EMEA brings together security and risk practitioners from leading European companies, consultants and government agencies to share innovative best practices and experiences in solving today's and preparing for tomorrow's critical security challenges.
