## INTELLECTUAL PROPERTY PROTECTION

Digital Guardian's Intellectual Property Protection (IP) Solution Pack is an optional package of pre-written rules that greatly extends Digital Guardian's core "Point of Use" control, monitoring, and auditing capabilities, to focus specifically on protecting and managing intellectual property. Intellectual property typically comes in multiple forms and file formats, and can represent a significant portion of a company's assets, as well as its competitive market advantage. The IP Solution Pack was specifically designed to protect this type of information, making it easy to configure Digital Guardian to comprehensively protect proprietary corporate information such as: product designs, technical specifications, research data, patents, process information, etc.

### PROTECT INFORMATION SHARED WITH PARTNERS AND SUPPLIERS – WORLDWIDE

Digital Guardian's IP Solution Pack is capable not only of controlling and tracking intellectual property use within an organization, but also information that must, of necessity, be distributed and shared with customers, and/or suppliers and partners around the world. Using this Pack, companies can now quickly and easily configure Digital Guardian to monitor and limit specific user actions that put intellectual property at greatest risk. For instance, protecting against illicit copying, transfer, printing, remote access and e-mailing of proprietary information.

### CENTRALIZED MONITORING AND REPORTING

Detailed Online Query and Summarization Reporting for All Alerts and User Transactions

### PROVIDES INTEGRATED VISIBILITY AND CONTROL

Digital Guardian's IP Solution Pack functionality is tightly integrated with the extensive analytics and drilldown reporting capabilities of Digital Guardian's Console Server. The IP Solution Pack facilitates capture of "high risk" actions by end-users of sensitive information, and maintains a detailed record and audit trail of what is subsequently done with that information. This gives systems administrators and business managers high-level, as well as granular, visibility into transactions involving intellectual property. It also allows them to track the movement and flow of intellectual property around the world from a central location.

### INTELLECTUAL PROPERTY PROTECTION FOR THE GLOBAL ENTERPRISE

Digital Guardian's IP Solution Pack Makes It Easy to Protect Information Shared With Employees, Customers, and Partners Around the World.

**Protect Confidential Documents:** Prevent the unauthorized copying and/or transfer of proprietary documents and other files containing confidential information.

#### Protect New Product Designs and Specifications:

Monitor and track the use of drawing, image, document, and other files containing new product concepts and detailed design information.

**Monitor the Flow of Intellectual Property:** Centrally manage and track the location and flow of intellectual property through an organization, as well as through its partner/supply chain worldwide.
